EDUCATION

University of Georgia Athens, GA
Bachelor in Business Administration, Management Information Systems May 2027
Information Security Emphasis, Minor in Consumer Economics, Certificates in Financial Technologies & AI in Business GPA: 3.81/4.00
Dean's List

TECHNICAL SKILLS

Programming & Data: Python, Java, Microsoft Office 365, SQL, SAP S/4HANA, ServiceNow, Airtable
AI/ML: Prompt Engineering, RAG Systems, Data Cleaning
Business: Agile, Project Management, UAT Testing, Process Automation, Budget Management, Financial Reporting

CERTIFICATIONS

Yellow Belt Lean Six Sigma
AWS AI Practitioner
AWS Cloud Practitioner (Expected November 2026)
ITIL V5 Foundation (Expected February 2027)

PROJECT EXPERIENCE

CarAdvise, *Student Consultant* January 2025-May 2025
- Collaborated with a six-member team to design digital solutions, reducing manual task duplication by 15%, and improving data accuracy through exploratory data analysis and process mapping.
- Enhanced internal processing systems through effective communication and detailed analytical reporting.
- Communicated critical insights to stakeholders, driving the maximization of internal processing systems relevant to business performance and optimization.

RAG AI Case Study, *Project Lead* August 2025-November 2025
- Led a technical team in developing an automotive Retrieval-Augmented Generation (RAG) system, managing the full project lifecycle from conceptualization to final delivery.
- Optimized model performance through advanced prompt engineering, high-accuracy output validation, and consistent AI model auditing.
- Developed a strategic implementation roadmap and actionable insights, evaluating model performance and stability through case studies and technical presentations.

WORK EXPERIENCE

Southern Poverty Law Center, *IT Project Management Intern* June 2026-Present
- Designed and implemented a Microsoft Power Automate workflow to streamline business communications and improve information flow across Microsoft 365 applications.
- Develop JSON data structures and HTML email templates to dynamically process, format, and present workflow information.
- Apply prompt engineering techniques to support AI-assisted processing and improve the consistency of generated outputs.
- Tested and troubleshot workflow logic and data handling while translating stakeholder requirements into a reliable automated solution.

University Housing, *Residential Belonging Assistant* July 2024-May 2026
- Directed a five-figure budget to develop inclusive learning environments and 75+ high-impact community events per semester, fostering social cohesion across multiple residential populations.
- Facilitated cross-functional communication within a diverse team to identify emerging community trends and execute events that addressed evolving resident needs.
- Orchestrated programming across multiple residential communities, serving as a primary campus resource and fostering an inclusive culture through tailored initiatives.

LEADERSHIP EXPERIENCE

AccessPoint UGA, *Founding Treasurer* July 2025-Present
- Establish fiscal infrastructure and a long-term budgetary roadmap to support the AccessPoint mission of expanding community accessibility and inclusive programming.
- Manage financial records and fund allocation, ensuring transparency and accuracy to support sustainable organizational growth and mission impact.
- Organize fundraising initiatives that exceeded four-figure goals, securing resources to advance accessibility-focused programming and long-term planning.
- Manage the end-to-end event budget approval process and authored End-of-Year Financial Reports to evaluate mission effectiveness and inform strategy.

Terry Analytics Lab, *Student Assistant* January 2026-Present
- Facilitate student mastery of Business Statistics topics, including Applied Statistics and Predictive Model Optimization, translating analytical concepts into actionable learning.
- Manage independent office hours as a campus resource for data analytics, providing tailored support to improve comprehension and academic success.
- Engage in cross-functional team meetings to refine teaching practices and stay current on emerging analytics trends, ensuring high-quality educational delivery.
